Call us today on **1800 111 381** for script ranges and limitations.

RX Safety strongly advise clients to select frames suitable for attachment of leaded side shields. A suitable selection and info sheet can be found on **www.rxsafety.com.au**

Single Vision minimum thickness 3.0 CT. D28 & Progressive minimum thickness approx 5.0mm CT.
 Progressive Design is Essilor Comfort.

Nylon, Rimless, false front and frames with very square corners are unsuitable for use with glass lenses and we cannot fit to these frames.

Glass X-ray lenses cannot be tinted or chem. hardened.

If base curve not specified we will pick the best curve based on frame and power.
