

Specialists in Certified & Compliant Safety Eyewear

Rx Safety's range of prescription safety spectacles is Australian Made at its Adelaide factory, adhering to the highest quality and safety standards.

Supplying industries as diverse as mining to manufacturing and from defence to dairy, Rx Safety was the first supplier to be granted a licence (SMKH 20404) to manufacture Certified Prescription Eye Protectors Against Medium Impact Resistance (AS/NZS1337.6).

If someone is working in a mine, building a submarine or refuelling a fighter jet there is a good chance Rx Safety made their eyewear.

Prescription Safety Certified Lens Range

Rx Safety's Certified range is subject to strict scrutiny including external testing of product, on-site surveillance audits, extensive in-house testing with ballistics testing, drop ball testing and penetration testing. All testing equipment is maintained within calibration intervals and calibrated by NATA registered authorities (National Association of Testing Authorities).

The Certified range is independently tested and certified by SAI Global receiving the 'tick tower'. The range is covered by both SAI Global Insurance and Rx Safety public liability insurance.

Certified Script Range

Although the script range can depend on frame and lens selection, the range of **+8.00/-6.00 to -10.00/-6.00** covers the needs of most wearers.

All of Rx Safety's Certified lenses are available in polycarbonate (1.59) and Trivex (1.53) materials.

Certified Frame Range

Rx Safety introduces new Certified frames annually. With an extensive and updated range of Certified safety frames in a variety of style and colour combinations, patients are sure to find a frame to their liking.

Rx Safety frames are selected to provide optimal properties in:

- Strength and durability
- Eye coverage
- Eye size allowing a wide range of scripts and pupillary distances

Certified Lens Treatments

Rx Safety makes Certified prescription safety eyewear in:

- Clear
- Grey tint
- Grey Transitions
- Grey NuPolar polarised lenses with hard coat, multicoat and anti-fog coating

Lens materials are available in 1.59 or 1.53 and can all be multicoated.

Compliant Range

Rx Safety also makes Compliant product for those wearers outside of the Certified script range.

Compliant eyewear is manufactured using exactly the same manufacturing process as Certified eyewear and is tested in the same way with identical job traceability as Certified eyewear. However, Compliant eyewear does not bear the 'tick tower'.

All Rx Safety's Compliant eyewear adheres to the standards set in AS/NZS 1337.6 and is covered by its public liability insurance.

Trusted Partners

Rx Safety sources only from trusted and quality lens suppliers: Younger Optics, Shamir Australia, Vision Ease (USA) and Xcel Optical (USA).

Frames are obtained from Ugly Fish, Hilco – Leader, Cummings Optical and Australian Safety Wholesales, all of whom are leading frame suppliers.

How to order

It's easy to do business with us even if you don't have an account.

1. Fill out your lens order using your own script pad or use ours at:
<https://rxsafety.com.au/order-forms/>
2. Email or fax your order to our team
Email: ebolto@rxsafety.com.au
Fax: 1800 111 461

We accept credit card payment (VISA or MasterCard) or payment via EFT.
